## 2.1.11 MARKET POSITIONING

### MANAGEMENT APPROACH

Market positioning is about global presence and engaging in emerging markets in order to adapt to market developments. The size of the business, new business development and sustainability benchmarks are seen as strong indicators of a successful management approach. Examples of metrics are the performance of the fleet, the revenue backlog, the number of projects won, the new developments in the renewables market, and SBM Offshore's ESG ratings performance. The effectiveness of actions related to these metrics is monitored through the regular business reporting cycle involving the Management Board.

SBM Offshore's strategy addresses material topics, aiming for a leadership position, from an economical, environmental and societal stand point. Through market positioning, SBM Offshore addresses the competitiveness risks mentioned in section 1.4.2.
