Not past due are those receivables for which either the contractual or 'normal' payment date has not yet elapsed. Past due are those amounts for which either the contractual or the 'normal' payment date has passed. Amounts that are past due but not impaired relate to a number of Company joint ventures and independent customers for whom there is no recent history of default, or the receivable amount can be offset by amounts included in current liabilities.

4.3.20 DERIVATIVE FINANCIAL INSTRUMENTS

Further information about the financial risk management objectives and policies, the fair value measurement and hedge accounting of financial derivative instruments is included in note 4.3.27 Financial Instruments – Fair Values and Risk Management.

In the ordinary course of business and in accordance with its hedging policies as of December 31, 2022, the Company held multiple forward exchange contracts designated as hedges of expected future transactions for which the Company has firm commitments or forecasts. Furthermore, the Company held several interest rate swap contracts designated as hedges of interest rate financing exposure. The most important floating rate is the US\$ 3-month LIBOR. Details of interest percentages of the long-term debt are included in note 4.3.23 Borrowings and Lease Liabilities. Lastly, the Company held commodity contracts in order to hedge against the fluctuation on operating cash flows and future earnings resulting from movement in commodity prices.

The fair value of the derivative financial instruments included in the statement of financial position is summarized as follows:

Derivative financial instruments

	31 December 2022			31 December 2021		
	Assets	Liabilities	Net	Assets	Liabilities	Net

Current portion	145	192	(47)	32	126	(94)

The movement in the net balance of derivative assets and liabilities of US\$635 million over the period is mostly related to the significant increased marked-to-market value of interest rate swaps, which mainly arises from increasing US market interest rates.

4 FINANCIAL INFORMATION 2022

An ineffective portion arising from cash flow hedges was recognized in the income statement in 2022 for US\$1 million (2021: none, refer to note 4.3.9 Net Financing Costs). The maximum exposure to credit risk at the reporting date is the fair value of the derivative assets in the statement of financial position.

No ineffectiveness was recognized due to the IBOR transition, refer to note 4.3.27 Financial Instruments – Fair Values and Risk Management.

4.3.21 NET CASH AND CASH EQUIVALENTS

	31 December 2022	31 December 2021
Cash and bank balances	109	662
Short-term investments	573	358
Cash and cash equivalent	683	1,021
Net cash and cash equivalent	683	1,021

The decrease of the Cash and bank balances mainly relates to the significant progress in the projects under construction and the related use of cash from the financing facilities secured in 2021, partially covered by the additional project financing granted for FPSO *ONE GUYANA* and the cash generated by Lease and Operate business segment.

The cash and cash equivalents dedicated to debt and interest payments (and therefore restricted) amounted to US\$235 million as per December 31, 2022 (2021: US\$152 million). Short-term investment deposits are made for varying periods of up to one year, usually less than three months, depending on the immediate cash requirements of the Company, and earn interest at the respective short-term deposit rates.

The cash and cash equivalents held in countries with restrictions on currency outflow (Angola, Brazil, Equatorial Guinea, Ghana and Nigeria) amounted to US\$21 million (2021: US\$23 million). These restrictions do not limit the liquidity of the cash balances.

Further disclosure about the fair value measurement is included in note 4.3.27 Financial Instruments – Fair Values and Risk Management.
