4 FINANCIAL INFORMATION 2022

An ineffective portion arising from cash flow hedges was recognized in the income statement in 2022 for US\$1 million (2021: none, refer to note 4.3.9 Net Financing Costs). The maximum exposure to credit risk at the reporting date is the fair value of the derivative assets in the statement of financial position.

No ineffectiveness was recognized due to the IBOR transition, refer to note 4.3.27 Financial Instruments – Fair Values and Risk Management.

4.3.21 NET CASH AND CASH EQUIVALENTS

	31 December 2022	31 December 2021
Cash and bank balances	109	662
Short-term investments	573	358
Cash and cash equivalent	683	1,021
Net cash and cash equivalent	683	1,021

The decrease of the Cash and bank balances mainly relates to the significant progress in the projects under construction and the related use of cash from the financing facilities secured in 2021, partially covered by the additional project financing granted for FPSO *ONE GUYANA* and the cash generated by Lease and Operate business segment.

The cash and cash equivalents dedicated to debt and interest payments (and therefore restricted) amounted to US\$235 million as per December 31, 2022 (2021: US\$152 million). Short-term investment deposits are made for varying periods of up to one year, usually less than three months, depending on the immediate cash requirements of the Company, and earn interest at the respective short-term deposit rates.

The cash and cash equivalents held in countries with restrictions on currency outflow (Angola, Brazil, Equatorial Guinea, Ghana and Nigeria) amounted to US\$21 million (2021: US\$23 million). These restrictions do not limit the liquidity of the cash balances.

Further disclosure about the fair value measurement is included in note 4.3.27 Financial Instruments – Fair Values and Risk Management.

4.3.22 EQUITY ATTRIBUTABLE TO SHAREHOLDERS

For a consolidated overview of changes in equity reference is made to the Consolidated Statement of Changes in Equity.

The hedging reserve consists of the effective portion of cash flow hedging instruments related to hedged transactions that have not yet occurred, net of deferred taxes. The increased fair value of interest rate swaps mainly arises from increasing market interest rates whereas the increased fair value of forward currency contracts is mainly driven by the variation of the US\$ exchange rate versus the hedged currencies.

Actuarial gain/(loss) on defined benefits provisions includes the impact of the remeasurement of defined benefit provisions.

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

The Management Board, with the approval of the Supervisory Board, has granted a call option to Stichting Continuïteit SBM Offshore to acquire a number of preference shares. As of October 1, 2022 and with reference to articles 5.5 and 5.6 of the Articles of Association of the Company, a 'Protective Preference Shares' reserve has been created at the expense of the share premium reserve at the level of the Company. If and when Stichting Continuïteit SBM Offshore would exercise the call option to acquire preference shares, these preference shares may also be paid-up from the reserve of the Company.

The Company's total equity as at December 31, 2022 is US\$3,397 million, out of which US\$1,860 million relates to legal reserves and US\$26 million relates to the statutory reserves (December 31, 2021: Total equity of US\$2,579 million out of which US\$1,211 million relates to legal reserves and US\$0 million to the statutory reserves). For more information, reference is made to note 4.5.5 Shareholders' Equity.
