The hedging reserve consists of the effective portion of cash flow hedging instruments related to hedged transactions that have not yet occurred, net of deferred taxes. The increased fair value of interest rate swaps mainly arises from increasing market interest rates whereas the increased fair value of forward currency contracts is mainly driven by the variation of the US\$ exchange rate versus the hedged currencies.

Actuarial gain/(loss) on defined benefits provisions includes the impact of the remeasurement of defined benefit provisions.

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.

The Management Board, with the approval of the Supervisory Board, has granted a call option to Stichting Continuiteit SBM Offshore to acquire a number of preference shares. If and when Stichting Continuiteit SBM Offshore would exercise the call option to acquire preference shares, these preference shares may also be paid-up from the reserve of the Company.
