The hedging reserve consists of the effective portion of cash flow hedging instruments related to hedged transactions that have not yet occurred, net of deferred taxes. The increased fair value of interest rate swaps mainly arises from increasing market interest rates whereas the increased fair value of forward currency contracts is mainly driven by the variation of the US\$ exchange rate versus the hedged currencies.

Actuarial gain/(loss) on defined benefits provisions includes the impact of the remeasurement of defined benefit provisions.

The foreign currency translation reserve is used to record exchange differences arising from the translation of the financial statements of foreign subsidiaries.
